Salary is individually set depending on your qualifications and experience.

All contracts follow local and national collective agreements.

### **Job description:**

#### **Job description**

Karolinska University Hospital is today one of Europe's leading university hospitals and is Region Stockholm's university hospital with special responsibility for secondary and tertiary healthcare. Karolinska also receives patients from other parts of the country, and from other countries.

The assignment also includes primary responsibility for the Stockholm Region's research and student education alongside the Karolinska Institute and other higher education institutions. The hospital employs around 15 500 people, across some 150 professional categories.

The hospital is organized according to patient pathways, in six theme areas and three functions, as well as central administrative functions supporting core clinical operations.

Operations are mainly run at the hospital's two sites, in Solna and Huddinge respectively.

## We are looking for:

Nurses who are interested in working in our wards in below patient pathways. Working as a nurse at the Karolinska University Hospital means that you are part of a multi professional team consisting of nurses, assistant nurses, medical doctors, physiotherapists, occupational therapists and dieticians. As a nurse you are responsible for 5-6 patients together with an assistant nurse.

At our wards we perform both acute as well as planned care.

### **Children**

We treat children from ages 0 – 18 years, both from the Stockholm area as well as other parts of the country. We care for children with chronic diseases, congenital malformations, various acute conditions as well as caring for premature born babies. We conduct specialized and highly specialized care and have a national healthcare assignment for certain advanced pediatric and adolescent surgery.

Please read more about us here (in Swedish) [Jobba på Astrid Lindgrens barnsjukhus](#)  
[karolinska.se](#)

### **Cardiology**

We conduct specialized and highly specialized cardiac care, both acute and elective. We treat patients with for example heart attack, heart failure, atrial fibrillation, pacemaker, heart valve disease and congenital heart defects.
